The Maximizer Series Fishing Rod

AVAILABLE MODELS INCLUDE:

The Maximizer # 1

SB843: 7 feet 0 inches long, 10 to 17 lb. test line, 5/16 to 3/4 oz. weight casting lures. This model has caught fluke using 1/2 and 3/4 oz. Spro jigs in 3 to 10 feet water depths.

In 45 foot water depth in the ocean this rod has controlled a 4 oz. bullet very easily. This has become my deeper water rod and can be used for porgy and sea bass.

The Maximizer # 2

SB822.5: 6 feet 10 inches long, 6 to 14 lb. test line, 1/8 to 5/8 oz. weight casting lures. This rod has worked using 1/2 and 3/4 oz. Spro jigs in shallow water. What a blast I had reeling in a 24 inch fluke with this fishing tool.

The Maximizer # 3

SJ782: 6 feet 6 inches long, 6 to 12 lb. test line, 1/8 to 3/8 oz. weight casting lures. I use this model with 1/2 oz. Spro jigs in shallow water, 3 to 10 feet deep. This has become my go to model in Shinnecock Bay.
